

Modernization of WCCHS Update

August 5, 2011

Four portables have been relocated from Calgary and are now on site at the WCCHS campus. Work continues to connect the portables to one another. A corridor will be built to connect them to each other as well as to link them to the main building. Work is also underway to bring services including gas and power to each of the portables.

Trades are on site at both the General Motors building where CTS classes will be offered and at Quill's where Foods classes will be scheduled. These sites are targeted to be ready for September occupancy.

The next update will be provided on August 22, 2011.
