

WCCHS Modernization Update

September 19, 2011

Grade 8 and 9 students are now moved into the portables at WCCHS. The former WCCHS site will no longer be available for public use as the Division prepares for the commencement of the modernization project. Throughout this process, the full range of student programming has been maintained. Students and staff have settled into new routines utilizing the various program locations.

In addition to the lunch room, one portable is now available at lunch time for students to eat and socialize. Food prepared by students in the commercial kitchen is now available at WCCHS.

The asbestos abatement contract has been awarded and the contractor will mobilize on September 26, 2011 to complete that work prior to the construction phase of the project. A walk through with potential general contractors will take place on September 27, 2011. It is anticipated that the building contract will be awarded on October 26, 2011.
